ABOUT THE MEETING

The **Central and Eastern European Meeting on Viral Hepatitis and HIV 2021** is an independent program, initiated in 2014 and developed by regional and international key opinion leaders for the medical and scientific community in Eastern and Central European countries. Advances in the treatment of viral hepatitis and HIV are continuing at a rapid and exciting pace and are presented and discussed at many large international conferences. Key challenges in the treatment of hepatitis B and C as well as HIV are specific for this region and need to be discussed among clinicians and scientists from these countries.

The **Central and Eastern European Meeting on Viral Hepatitis and HIV 2021**, taking place as a virtual program from **14-15 October**, aims to bring together infectious disease clinicians, gastroenterologists, hepatologists, and other specialists, enabling them to present the latest research and clinical data and provide a platform for multi-disciplinary interaction and dialogue.

Join us in October to hear an in-depth review of the progress made towards ending the epidemics and get updated on new treatment and prevention guidelines.

The conference will cover, among others:

- Towards Ending HIV and Viral Hepatitis: Where Do We Stand?
- Hot Topics in Antiretroviral Therapy
- What is New in Prevention?
- HIV, Viral Hepatitis & COVID-19
